Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of the embodiment disclosed on page 7, lines 36, first embodiment; in particular, the first embodiment that the processing unit starts writing print data from print data storing unit to spool file storing unit before processing unit finishing storing the print data in the print data storing unit of the first embodiment (page 9, lines 9-16).

II. Species of the embodiment disclosed on page 15, lines 15, second embodiment; in particular, the second embodiment that when the device control filter is not analyzing and processing the print data, the processing unit reads out the print data of each print jobs in accordance with a specific condition which determines an output sequence of the registered print jobs stored in the print data storing unit and writes the read out print data to the spool file storing unit and the specific condition is set by a user (page 15, lines 32-37, page 16, lines 1-11).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2625

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
